## **Green Living Festival**

To raise the awareness of waste reduction to HAESL staff members, the SD team organised a series of activities named "Green Living Festival" in every Wednesday of January, 2024. The activities include natural dye workshop, pet toys upcycling workshop, electrical appliances repair services, electric fan repair workshop and swap party.

The activities were well received by staff members. Many staff members were amazed with the products that they made, such as handkerchiefs that dyed with sweet potato leaves and pet toys that made from their old cotton clothes. In addition, staff members were delighted that their damaged electrical appliances could be fixed and they could learn repairing techniques of electric fans from experienced tutors.

As Lunar New Year and the municipal solid waste charging were approaching, the swap party was popular among staff members. The SD team invited a local recycler, MilMill to co-organise the event. Any goods that were above 70% new were collected from staff members. The collected goods were then sorted and placed on the tables for other staff to choose. Mil Mill also brought many interesting books that collected from other places of Hong Kong, many staff members picked several books away. Besides, there were popcorn booths where staff members can get free popcorn with their own containers. Game and recycled paper making booths were also set up to promote recycling and reuse among staff members. The uncollected goods were given to Mil Mill, which were carried to other swap parties in Hong Kong.

As the swap party was well received from the staff members, the SD team has proposed to organise another round together with other environmental promotion activities and games in June, 2024.
